

## FUEL ADDITIVE COMPOSITIONS

### Abstract of the Invention

5 A fuel additive composition comprising a sustained  
release component and an additive component, the additive  
component is effective to provide at least one benefit to  
a fuel when released into the fuel, the sustained release  
component is (1) a polymeric material, (2) substantially  
insoluble in the fuel, and (3) effective to reduce the rate  
of release of the additive component into the fuel  
relative to an identical composition without the sustained  
10 release component.
